—ASTROLOGY—Everything in nature is constructed upon satural principles and governed by matural laws. The laws of affinity and relation would, if properly inderstood, unfold to the wondering gaze of man truths so simple in regard to many things now generally considered impossible, that he would wonder at his own ignorance and incomprehension. The science of Astrology, though at present called by many a humbay, would then be made to reveal the destiny of mankind, and enable them to go right on their course, with a compass and chart to guide their life in a proper channel. We know that the position, or electrical condition, of the various planets changes the seasons; and their peculiar electrical conditions will work changes in the elementary principles of man's organization. As rology is prepared to rend. Irom the position and aspect of the stars at the time of their birth, their future life, from the unavoidable influence impressed by their relation to the constituent elements of their organization. As a science, this is undertood only by a few individuals, among whom stands first Frof C W ROBACK, No. 6 White st.
